# A Clear Vision

The PLR Anières is committed to **responsible financial management**, **moderate taxation**, **security for all**, and the **protection of private property**. We also aim to preserve our **rural environment**, enhance **quality of life**, and promote **smooth and sustainable mobility**.

## Responsible and Transparent Governance

We pledge to ensure responsible and transparent management of municipal finances. This includes **rigorously optimizing expenses** by eliminating unnecessary costs such as excessive legal consultations while limiting investments to essential projects. Given the budget surpluses accumulated in recent years, we plan a **tax reduction** by lowering the additional centime, thereby **restoring purchasing power to residents**. Additionally, we aim to enhance **communication and transparency** by organizing public consultations in advance for major projects, preventing costly referendums. Lastly, the modernization of the municipal website will simplify access to official documents, ensuring **clear and accessible information for all**.

## Enhanced Security

To strengthen security within the municipality, we plan to increase **patrols**, especially on weekends and during holidays, to prevent incivilities and crimes.

We will also explore the installation of **surveillance cameras** in strategic areas to deter and effectively prevent burglaries. Furthermore, we wish to encourage **citizen vigilance** by supporting local neighborhood initiatives, in close collaboration with municipal authorities and the police, to reinforce security and community solidarity.

## Preserving Rural Heritage

We commit ourselves to preserving Anières' rural character by **protecting villa zones** from excessive densification, ensuring a harmonious living environment respectful of the village's identity. All urban planning projects will be carried out **in consultation with residents and local associations**, promoting controlled and adequate development. Additionally, we seek to strengthen **collaboration with farmers and winemakers** to highlight our local heritage and preserve local traditions. We will also **actively support local associations** to energize local life and encourage citizen initiatives.

## Quality of Life

We commit to enhancing quality of life in Anières by addressing residents' concrete needs. For families, the rapid construction of an **after-school facility** will provide appropriate childcare.

Regarding healthcare, the opening of a **medical center** bringing together doctors and therapists will ensure local access to care. We will also support **at-home care services for the elderly**, promoting their independence. In accordance with our sustainability goals, we will encourage the use of **renewable energy sources**, while ensuring financial viability of these projects. Additionally, we will reintroduce **household bulky waste collection** to improve residents' living conditions. Finally, we will modernize **sports infrastructure** to create accessible, durable facilities tailored to everyone's needs.

## Smooth and Sustainable Mobility

We are committed to improving mobility in Anières by implementing effective solutions tailored to residents' needs. We will work with TPG (public transport authorities) to **increase bus frequency and ensure direct connections** to key transport hubs such as Cornavin station, Léman Express, and the airport. To preserve smooth traffic flow, we **oppose speed reductions on cantonal roads**, which would unnecessarily slow daily commutes. Furthermore, we will implement traffic restrictions on secondary roads to **protect residents' peace and safety**. Finally, we will increase **subsidies for electric bike purchases**, offering a practical and eco-friendly alternative to motorized transport.

## Claire Thibault Bulliard

**A committed candidate for Anières!**

At the head of a nonprofit foundation, her commitment has made her aware of the importance of solidarity and listening to the needs of others.

### Her Vision for Anières

She advocates for responsible management of municipal finances, ensuring high-quality public services while reducing the tax burden. Security remains a priority, with increased patrols and vigilance measures. Committed to preserving the living environment, she promotes controlled and collaborative urban development, incorporating suitable housing, multi-functional spaces, and public and recreational infrastructure while maintaining the village's identity. Her commitment to balanced development is reflected in limiting excessive densification, promoting sustainable mobility, and improving public transport to better connect Anières with surrounding hubs. She supports a balanced energy transition by ensuring that financial aid is accessible to all, encouraging the use of renewable energy. Dedicated to local dynamism, she values associations, businesses, and local services to strengthen community life and foster connections among residents.

### Her Commitment

A desire to get involved and influence change led her to join the Municipal Council. During her first term, she discovered the richness of local politics and the tangible impact of decisions on the community. Listening to residents, voicing their concerns, and defending their interests are priorities for her. She takes a pragmatic and human-centered approach, favoring dialogue, proximity, and concrete actions.

### Her Background

With experience in both the private and nonprofit sectors, she has held management and coordination roles, developing a responsible vision of economic and organizational challenges.
